ASSERTION
a match is a candidate, not a clearance. Nothing here claims the contract is safe.

PLACARDS
no placard matched. That is not the same as safe.

NOT CHECKED
  - resolution is best effort: unknown proxy patterns, diamond facets and beacons pointing at beacons
  - are labelled not followed
  - reachability
  - economic preconditions
  - state at any particular block
  - source-level reasoning
  - anything not covered by a placard
